

# app4STATICS: Problem entry form

## Step 1. Enter the topic and problem number.

TOPICS:  PROBLEM NUMBER:

Cables\_1

## Step 2. Enter the problem statement. Problem statement entered.

A load weighing  $W$  N is attached to a cable by a frictionless slide ring. The cable is anchored at A and C. Its length is  $L_c$  meters.

- (1) What is the equilibrium position of the ring,  $x_B, y_B$ ?
- (2) What is  $T_c$ , the tension in the cable, in N?

## Step 3. Enter the instance variables. Instance variables entered.

$W, N, 80, 120, RU$   
 $L_c, m, 4.5, 6.0, RU$

## Step 4. Enter the answer variables. Answer variables entered.

NOTE. For answer type 'fofx', enter 'avlbl:fofx:f(x):xs:xe', one vbl per line.

$x_B, y_B$   
 $T_c$

## Step 5. Check the problem form data. SUBMIT to save problem data.

## Step 6. Submit the problem form. Cables\_1 Setup successful.
